Summary

I'm a full-stack software developer who has experience in Blockchain, Ethereum, Polygon, Solana, Tron, Cardano, Algorand, Terra, NFT minting/marketing website, DAO, DApps, DeFi web/mobile app development from scratch, including Smart Contracts, Solidity development.
I always focus on the client's happiness and product quality and am also looking for a long-term project and relationship.
As a driven developer, I strive to create engaging applications constructed with clean and efficient code. Strong foundations in web/mobile development technologies include JavaScript, Swift, Android/Java/Kotlin, Ruby on Rails, Golang, PHP, React.js, Vue.js, React Native, jQuery, and so on.

Experience

Software Engineer
Enginum, Inc
Jul 2020 - Present (2 years 5 months +)
I'm a full-time freelancer

Freelance Software Engineer
Upwork
Jul 2020 - Present (2 years 5 months +)

Software Engineer
HANA
Apr 2019 - Jul 2020 (1 year 4 months)
• Responsible for creating a business level mobile-application that allows people to give recommendations for specific categories and allows other people to see their local recommendations easily
• Built with React Native and synced to Google Firebase real-time database for users to post local food recommendations and store data into the application
• Developed app in Expo CLI environment for testing and viewing live updates before deployment
• Composed Redux-Saga middleware to coordinate asynchronous actions when connecting to the database

- Constructed a Figma wireframe and storyboard to plan out ideal functionality and design
- Collaborated with other developers for planning, UI/UX suggestions, and troubleshooting issues

Software Engineer
Skelia
Feb 2015 - Apr 2019 (4 years 3 months)
- Design, develop, maintain, and test software for startup company's social media platform.

Education

Fairfield University
Bachelor of Computer Science, Computer Engineering
Aug 2012 - Jul 2015

Licenses & Certifications

App Development Bootcamp - Bootcamp

Skills

Polygon • Solana • Algorand • GraphQL • Apollo GraphQL • Ethereum • Blockchain • Amazon Web Services (AWS) • JavaScript • Python (Programming Language)
